

Unlearning repair quality under non-IID federated partitions

Dirichlet $\alpha=0.35$; forget ratios 0.25, 0.50, and 1.00; error bars show 95% confidence intervals over seeds.

Legend: FedEraser (yellow dashed line with triangle), FedRecovery (blue dashed line with diamond), Starfish (orange solid line with hexagon), MA-ABE-FU (pink solid line with star), Oracle (black dashed line with cross).
